

CAREER OPPORTUNITY

Operations/Engineering Manager

JOB SUMMARY

Our client is a national company providing innovative and effective services and solutions regarding environmental sustainability and building sciences initiatives. The company has a reputation as a highly-trusted consulting firm that is responsive in today's rapidly shifting economic, environmental, social, and political terrain. They currently seek an **Operations/Engineering Manager** for their Building Sciences Division in their Winnipeg, MB branch.

RESPONSIBILITIES

- A strong focus on business development with new and existing clients
- Assisting in the development of new services in accordance with company goals and objectives in meeting clients' needs
- Financial and administrative responsibility for the activities of the group; full P&L responsibility for the assigned region
- Supervision of Project Managers, Technologists, and Specialists; training and mentoring of employees
- Coordination of project-related activities for Building Science staff; liaison between clients and staff
- Maintaining and enhancing quality control
- Performing Project Management duties where necessary for clients in the respective geographic area
- Coordinating work and clients contracts with other offices or groups within the Client Group of Companies

QUALIFICATIONS

A college diploma is required, preferably in Construction, Architectural Technology, or other Building Science related degree.

A Professional Engineer (P.Eng) designation is an asset.

Demonstrated experience in a similar role including specific experience in leadership, project management, design, and a familiarity with a wide range of structural and building envelope systems typical of Manitoba institutional, commercial, and industrial buildings.

A thorough understanding of relevant building codes in Manitoba is required.

Expertise in building construction or maintenance in regards to hazardous building materials.

Knowledge in new and existing building projects and experience with retrofitting of existing buildings, abatement, and contract management.

Proven ability to attract new business, develop existing client base, and recognize new market opportunities.

Must have excellent leadership, strong interpersonal, presentation, and team building skills and shall possess a high level of oral and written communication skills to be successful in this role.
