

MAKING THE MOST OF YOUR MEMBERSHIP

BOMA Member Since 2008

Member spotlight: Craig Doerksen

Divisional Director, Facility Management
Health Sciences Centre

“*Industry connections—not just casual—but some genuine ones get built around BOMA’s lunch meetings and my involvement with the BOMA membership committee. Getting involved means getting value.*”

Craig Doerksen has been involved in hospital facilities since 1991, getting his earlier start as a consultant in the mid 1980s. His job as Division Director calls for providing leadership and overseeing the many aspects of facility management within the HSC; including maintenance, housekeeping, security, energy management and engineering/support.

Looking to become better aware of the building industry as a whole—as well as gaining a window into the non-hospital industry to see how it intersects with his own—Craig joined BOMA in 2008.

Craig is happy to report that his expectations for becoming a member have been exceeded. In addition, BOMA has provided him with a context for the property development industry.
